## Summary

This document is intended to provide an indication as to the maximum gain and loss that could be expected under the above portfolio; it intends to highlight both the historic and anticipated risk level, and, by extension the inherent volatility that is to be expected with this investment. We stress that historic performance is not an indicator of future performance, nor will the expected volatility figures be correct in 100 per cent of circumstances.

## Historic

This portfolio has achieved a positive return on average over the medium term. However, there have been both losses and gains within the portfolio during this period. Within the last three years the portfolio has seen a gain of 4.41% and losses of as much as -3.62% within a year. In monetary terms someone investing £10,000 may have seen a gain of £441 or a loss of £362.

The above figures are intended to give an indication but are **not a guarantee** of the range of potential annual gains and losses.

## Prospective

The following information has been produced by Towers Watson for Old Mutual Wealth and subsequently passed to ourselves; Tower Watson aim to provide an indication of future investment returns accurate to 2 Standard Deviations (correct 95% of the time provided returns are normally distributed), this is achieved through a process known as Stochastic Modelling; simply running multiple economic scenarios in an attempt to ascertain how macroeconomic conditions will effect investment returns.

Towers Watson anticipate that the above portfolio might see a maximum annual return of 11.14% and a maximum loss of -5.18%, with an average return of 2.98% annually. Monetarily; £10,000 might grow by £1,114, shrink by £518 or grow on average by £298. You should note that under this assumption there is a 5% chance that the return/loss may fall outside these bounds.

## FIXED INCOME

# AXA US Short Duration High Yield Fund

A Sub-Fund of AXA Fixed Interest Investment ICVC

Share class : AXA US Short Duration High Yield Fund Z (G) Accumulation GBP (ISIN: GB00B59VLT43)

This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

The aim of the Fund is to provide high income.

### Investment Policy

The Fund invests primarily in a diversified portfolio of high yield bonds issued by US companies where the period for full repayment of the bond by the company is expected to be less than 3 years. The fund manager seeks to reduce the effect of credit risk through diversification and its analysis and selection of investments.

The Fund aims to reduce the risk of movements in exchange rates between US Dollars and Sterling through the use of derivatives (financial instruments which derive their value from the value of other assets). The Fund may also use derivatives in an attempt to reduce the overall risks of its investments, reduce the costs of investing or generate additional capital or income (known as Efficient Portfolio Management - EPM).

### Income

Income from investments in the Fund will be rolled up into the value of your shares if you hold accumulation shares.

### Fund Currency

The reference currency of the Fund is Sterling.

### Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within three years.

### Processing of subscription and redemption orders

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £1,000,000

Minimum subsequent investment: £5,000

## Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

### Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

### Additional Risks

**Counterparty Risk:** failure by any counterparty to a transaction (e.g. derivatives) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

**Derivatives:** derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

**Interest Rate Risk:** fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

**Liquidity Risk:** some investments may trade infrequently and in small volumes. As a result the Fund manager may not be able to sell at a preferred time or volume or at a price close to the last quoted valuation. The Fund manager may be forced to sell a number of such investments as a result of a large redemption of shares in the Fund. Depending on market conditions, this could lead to a significant drop in the Fund's value and in extreme circumstances lead the Fund to be unable to meet its redemptions.

**Credit Risk:** the risk that an issuer of bonds will default on its obligations to pay income or repay capital, resulting in a decrease in Fund value. The value of a bond (and, subsequently, the Fund) is also affected by changes in market perceptions of the risk of future default. The risk of default for high yield bonds may be greater.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

## Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

**One-off charges taken before or after you invest**

Entry charge	5.00%
Exit charge	none
This is the maximum that might be taken out of your money before it is invested.	

**Charges taken from the fund over a year**

Ongoing Charges	0.76%
-----------------	-------

**Charges taken from the fund under certain specific conditions**

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The ongoing charges figure is based on expenses for the twelve month period ending December 2018. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to AXA IM website: <https://retail.axa-im.co.uk/fund-charges-and-costs> as well as the Fees and Expenses section of the prospectus which is available at [www.axa-im.com](http://www.axa-im.com).

## Past Performance

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Fund was launched on 30/04/2010 and the share class in 2010.

Past performance has been calculated in Sterling and is expressed as a percentage change of the Fund's Net Asset Value at each year end.

## Baillie Gifford American Fund - Class B Shares

Accumulation Shares - ISIN GB0006061963 (also representative of Income Shares ISIN GB0006061856)

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

### Objectives and investment policy

#### Objective

- The Fund aims to produce capital growth over the long term.

#### Policy

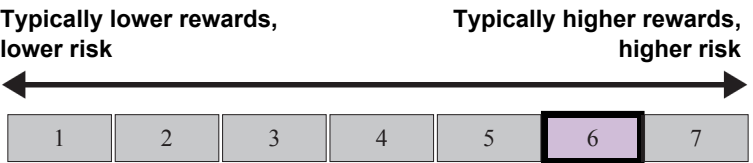

- To invest in any economic sector, either directly or indirectly, of the United States of America.
- Investment will be mainly in shares of companies.
- The Fund will be concentrated.

#### Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
  - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
  - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
  - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
  - The Fund's concentrated portfolio and long-term approach to investment may result in large movements in the share price.
  - The Fund's exposure to a single market and currency may increase share price movements.
  - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
  - The result of the UK Referendum on membership of the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.52%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Accumulation shares and is at 31/10/2018.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

## Past performance

Source: FE 2019

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 31/07/1997.
- Share/unit class launch date: 28/03/2002.
- Performance is calculated in GBP.
- Performance is for Accumulation shares.
- Performance reflects the annual charge but excludes any initial charge paid.
- Performance figures are to 31 December each year.

## Practical information

- The Fund's Depositary is NatWest Trustee & Depositary Services Limited.

### BlackRock Cash Fund

Class OS Accumulating GBP

ISIN: GB00BYYQBS68

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The Fund aims to achieve a competitive rate of interest on your investment, consistent with maintaining capital and ensuring that its underlying assets can easily be bought or sold in the market (in normal market conditions).
- ▶ The Fund invests principally in cash, deposits and money-market instruments (i.e. debt securities with short-term maturities) denominated in Sterling.
- ▶ The money-market instruments will be issued by both UK and non-UK governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- ▶ The investment adviser has discretion to select the Fund's investments.
- ▶ The Fund is a "Short Term Variable NAV Money Market Fund" as defined by the EU Money Market Funds Regulation.
- ▶ The investments of the Fund are valued using the mark-to-market method where possible, and if not, the mark to model method is used. The net asset value (NAV) is calculated to four decimal places and forms the dealing NAV.
- ▶ Recommendation: This Fund may not be suitable for investors who seek long-term capital growth.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

## Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 25 January 2019. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.27%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 1990. The unit class was launched in 2017.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Historic performance to 31 December 2018

## Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at [www.blackrock.com](http://www.blackrock.com) or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at [www.blackrock.com/Remunerationpolicy](http://www.blackrock.com/Remunerationpolicy) or on request from the registered office of the Management Company.

### iShares Global Property Securities Equity Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class H Accumulating GBP

ISIN: GB00BPFJCF57

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The Fund aims to achieve capital growth by tracking closely the performance of the FTSE EPRA/NAREIT Developed Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities of leading property companies listed globally. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund uses optimising techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other securities which provide similar performance to certain constituent securities. These may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

## Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
  - ▶ The risk category shown is not guaranteed and may change over time.
  - ▶ The lowest category does not mean risk free.
  - ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Investments in property securities can be affected by the general performance of stock markets and the property sector. In particular, changing interest rates can affect the value of properties in which a property company invests.

- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2010. The unit class was launched in 2014.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Historic performance to 31 December 2018

† Benchmark: FTSE EPRA / NAREIT Developed Index (GBP). As of 31 December 2014, the Benchmark Index converted from a close of business valuation to a midday valuation. Historic performance of the Benchmark has been simulated by the Benchmark provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 31 July 2009 or from the launch of the share class if later.

### iShares Index Linked Gilt Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B83RVT96

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment through a combination of capital growth and income on the Fund's assets by tracking closely the performance of the FTSE Actuaries UK Index Linked Gilts Over 5 Years Index, the Fund's benchmark index.
- ▶ The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The benchmark index measures the performance of United Kingdom (UK) domestic Government index-linked bonds. It consists of FI securities denominated in Sterling that pay coupon (i.e. interest) and principal in Sterling, and are issued by the UK Government. The FI securities must be capital-indexed and linked to an eligible inflation index (i.e. their principal value is protected against inflation). The FI securities will have a credit rating at the time of inclusion in the benchmark index linked to that of the UK Government. They will have a time to maturity (i.e. the time until they become due for repayment) of at least 5 years.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 24 December 2018. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2012. The unit class was launched in 2012.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Historic performance to 31 December 2018

† Benchmark: FTSE Actuaries UK Index Linked Gilts Over 5 Years Index (GBP). As of 29 April 2016, the benchmark index converted from a close of business valuation to a midday valuation. Historic performance of the benchmark index has been simulated by the benchmark index provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 27 February 2015 or from the launch of the share class if later.

## Fidelity Asian Dividend Fund

a sub-fund of Fidelity Investment Funds

W Accumulation Shares (ISIN: GB00B8W5LX86)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- Aims to provide income and long-term capital growth.
- Invests primarily in the securities of companies in the Asia Pacific region, including ordinary shares, preference shares, convertibles and fixed interest securities. The choice of assets is guided by attractive dividend yields in addition to the potential for capital growth.
- Can use derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the fund's risk profile.
- The fund has discretion in its choices of investments within its objectives and policies.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- The benchmark against which performance is assessed is the MSCI AC Asia Pacific ex Japan High Dividend Yield Index (NUK). The VMF share class has a variable management fee which is calculated by referencing performance relative to this index.

### Risk and Reward Profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

### Important Information

Past performance has been based on prices that include simulated values. All performances are inclusive of any net reinvested income and exclusive of any reinvested rebates. Performance figures and yields are as at 31/05/2019. A minority of funds also feature a performance related fee which is not shown here. Please refer to your Funds List for further information. Source: FE. The value of investments and the income from them can fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Past performance is not a guide to the future.

## Investment Objective

The Fund aims to provide income and grow your investment. The Fund invests in shares of companies that are involved in infrastructure around the world. The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports services, marine ports and services, and oil and gas storage and transportation. The Fund does not invest directly in infrastructure assets. The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

The fund risk score is based on historic volatility, as measured by standard deviation of returns, of the fund over the indicated time period. The historic volatility is then translated to the fund risk level which is a whole number ranging from 1 (least risky) to 10 (most risky). Fund risk scores provide a retrospective view of a fund's volatility, which may vary widely over different time periods, and are not necessarily indicative of a fund's future volatility.

# Key Investor Information

# Fundsmith Equity Fund

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## I Class Shares in Fundsmith Equity Fund

**Accumulation Shares (ISIN: GB00B41YBW71)**

**Income Shares (ISIN: GB00B4MR8G82)**

**The fund is managed by Fundsmith LLP**

### Objectives and investment policy

The fund's objective is to achieve long-term growth in value, investing in shares of companies on a global basis. The fund's approach is to be a long-term investor in its chosen stocks and it will not adopt short-term trading strategies. The fund aims to invest in businesses:

- that can sustain a high return on operating capital employed;
- whose advantages are difficult to replicate;
- which do not require significant borrowing to generate returns;
- with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- that are resilient to change, particularly technological innovation;
- whose valuation is considered to be attractive;

The fund will not invest in derivatives nor hedge any currency exposure. The fund will not borrow money, except in unusual circumstances. The fund does not track a particular benchmark.

An investor, or prospective investor, may buy or sell their shares on demand each business day in the UK. Instructions to buy or sell received before noon will be implemented that day; instructions received after noon or on a non-business day will be implemented at noon on the next business day.

For the Accumulation Shares, the dividends are reinvested in the fund. For the Income Shares, the dividends are paid out to you from the fund.

**Recommendation:** This fund invests for the long-term and may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. The fund is in Category 5 reflecting the risks inherent in the fund's investment portfolio, including that of capital losses. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

**Currency risk:** The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price of shares in the fund may therefore rise or fall purely on account of exchange rate movements.

**Concentration risk:** The investment criteria adopted by the fund significantly limits the number of potential investments. The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

**Operational risk:** Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

## Charges

The charges for the fund are shown below. The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2018. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 0.90% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

### One-off charges taken before or after you invest

## Past performance

This performance is calculated based on the net asset value per class (which includes all charges) and assuming the income has been re-invested in the fund.

Past performance is not necessarily a guide to future performance. The performance is shown in Pounds Sterling.

The fund was established in November 2010.

# INSTITUTIONAL LONG DATED CREDIT FUND

Janus Henderson  
INVESTORS

Class I Inc ISIN: GB0007475675

A sub-fund of Janus Henderson UK & Europe, an OEIC managed by Henderson Investment Funds Limited.

## Objectives and investment policy

### Objective

The Fund aims to provide a combination of income and capital growth.

### Investment policy

The Fund invests primarily in:

- Long-term investment grade bonds from corporate issuers.

The Fund may also invest in:

- Money market instruments
- Bank deposits
- Bonds of other types, from any issuer.

In choosing investments, the investment manager looks for fixed income instruments that offer attractive interest rates and potential for protection of capital.

The Fund may use derivatives to achieve the Fund's investment objective, to reduce risk or to manage the Fund more efficiently.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

**Fund currency** GBP **Share class currency** GBP

### Terms to understand

**Bonds** Securities that represent an obligation to repay a debt along with interest.

**Derivatives** Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

**Money market instruments** A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

**Volatility** How sharply the Fund's share price has gone up and down over a period, generally several years.

*You can buy, sell or switch shares in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.*

*The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).*

## Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦			
♦ Lower risk			Higher risk ♦			
1	2	3	4	5	6	7

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Default Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	0.00%
--------------	-------

Exit Charge	0.00%**
-------------	---------

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

### Charges taken from the Fund over a year

Ongoing Charges	0.54%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 30 June 2018. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

## Past performance

The past performance is calculated in GBP.

The Fund was launched in April 1987 and the share class was launched in April 1997.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except entry charges.

# STRATEGIC BOND FUND

Class I Acc ISIN: GB0007533820

Janus Henderson  
INVESTORS

A sub-fund of Janus Henderson UK & Europe, an OEIC managed by Henderson Investment Funds Limited.

## Objectives and investment policy

### Objective

The Fund aims to provide a combination of income and capital growth.

### Investment policy

The Fund invests in:

- Bonds of any quality from corporate or government issuers, including high yield (non-investment grade) bonds, worldwide.
- Where investments are made in currencies other than Sterling, the Fund will seek to hedge the portfolio back to Sterling to remove exchange rate risk.

The Fund may also invest in:

- Bonds of other types, from any issuer.
- Preference shares of companies in any country or industry, although not to a significant extent.
- Money market instruments
- Bank deposits

In choosing investments, the investment manager looks for fixed income instruments that offer attractive interest rates and potential for protection of capital.

The Fund may use derivatives to achieve the Fund's investment objective, to reduce risk or to manage the Fund more efficiently.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This Fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

**Fund currency** GBP **Share class currency** GBP

### Terms to understand

**Bonds** Securities that represent an obligation to repay a debt along with interest.

**Derivatives** Financial instruments whose value is linked to the price of an underlying asset (eg indices, rates, share prices).

**Money market instruments** A short term debt instrument, issued by a government or company as a way to raise money. Generally considered a cash equivalent.

**Preference shares** Securities that represent fractional ownership of a company and typically pay a fixed dividend but lack voting rights.

**Volatility** How sharply the Fund's share price has gone up and down over a period, generally several years.

*You can buy, sell or switch shares in the Fund on any business day, as defined within the "Definitions" Section of the Fund's prospectus.*

*The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).*

## Risk and reward profile

♦ Potentially lower reward			Potentially higher reward ♦				
♦ Lower risk			Higher risk ♦				
1	2	3	4	5	6	7	

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in share price in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Default Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

**High Yield Bonds** The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Currency Hedging** When the Fund, or a currency hedged share/unit class of the Fund (with 'Hedged' in its name), seeks to mitigate (hedge) exchange rate movements of a currency relative to the Fund's base currency, the hedging strategy itself may create a positive or negative impact to the capital value of the Fund or share/unit class due to differences in short-term interest rates between the currencies.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Charges to Capital** Some or all of the Annual Management Charge and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	0.00%
--------------	-------

Exit Charge	0.00%**
-------------	---------

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

### Charges taken from the Fund over a year

Ongoing Charges	0.69%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 30 June 2018. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information about charges, please see the "Charges" section of the Fund's prospectus.

## Past performance

The past performance is calculated in GBP.

The Fund was launched in October 1986 and the share class was launched in May 2000.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except entry charges.

## Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 6 because its Net Asset Value has shown high fluctuations historically.

### Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.
- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and

general market conditions. Furthermore, participation notes run the risk of counterparty default which may result in the loss of the full market value of the note.

- ▶ Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.
- ▶ The Fund may be concentrated in a limited number of securities, industry sectors or countries and as a result, may be more volatile than more broadly diversified funds.
- ▶ The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.
- ▶ Movements in currency exchange rates can adversely affect the return of your investment.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

## Charges

### One-off charges taken before or after you invest

**Entry charge** None

**Exit charge** None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from this Share Class over a year

**Ongoing charge** 0.90%

### Charges taken from this Share Class under certain specific conditions

**Performance fee:** None

- ▶ The actual entry and exit charges paid may be less. Information on charges can be obtained from the investor's financial adviser.
- ▶ The Prospectus permits a fee to be charged for switching between Funds but this fee is currently waived by the Authorised Corporate Director.
- ▶ The ongoing charge is based on the last year's expenses to December 2018 and may vary from year to year.
- ▶ Charges are used to pay the costs of running this Share Class. These charges reduce the potential growth of the investment.
- ▶ Further information about charges can be found in "Part 5: Charges and Expenses" section of the Prospectus.

## Past Performance

- ▶ Past performance is not a guide to future performance.
- ▶ Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in GBP.
- ▶ Fund launch date: 1978.
- ▶ Share Class launch date: 2012.

- 1 This performance was achieved under circumstances that may no longer apply.
- 2 The performance shown prior the launch date of this share class relates to the A share class. The A share class performance has not been amended or simulated to adjust for the lower ongoing fees of the C share class.

## Objectives and investment policy

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

## Risk and reward profile

**Typically lower rewards,  
lower risk**                      **Typically higher rewards,  
higher risk**

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- The Fund invests into a specific market sector and its value may be subject to periods of high volatility, causing the value of the Fund to fall and rise sharply over short periods of time.
- The Fund has the ability to use derivatives for efficient portfolio management purposes. Investments in financial derivative instruments used for efficient portfolio management can introduce leverage risks and negatively impact performance.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

# Lindsell Train Global Equity Fund

## Class B (ISIN: IE00B3NS4D25)

### A sub-fund of Lindsell Train Global Funds plc

## Objectives and Investment Policy

### Objective

The fund's aim is to achieve growth through both share price appreciation and income from the shares.

### Investment Policy

The fund invests directly in the shares of global companies primarily quoted on recognised exchanges in developed countries.

Essential features of the Fund:

- This is a concentrated fund which means that it holds fewer shares than many other funds; typically between 20 and 35.
- The share class investment performance is compared with the total (i.e. capital and income) return on the MSCI World Index in GBP terms.
- The investment manager has discretion in selecting investments within the fund's objective and investment policy. There are no restrictions in terms of stock or sector allocation versus the benchmark.
- This class does not use currency hedging.
- This class is a distributing class, meaning any income will be paid out to you twice a year. There is an option to reinvest the dividends back into the fund.
- You can buy and sell shares in the fund on any week day on which commercial banks are open in Dublin and London.
- This fund may not be appropriate for investors who plan to withdraw their money within five years.
- Please refer to the Prospectus for further information.

## Risk and reward profile

- This scale gives an indication of how much a fund's performance has fluctuated in the past and therefore the potential risk of losing money.
- This indicator is based on five year historical data and may not be a reliable indication of the future risk profile of this share class.
- The risk number is not guaranteed and may shift over time.
- The lowest category does not mean risk free.
- This share class has been classed as 5 because its volatility has been measured as above average.
- The fund does not offer any capital guarantee or protection.

Risks that are materially relevant to the fund include :

- The fund invests in shares of companies and the value of these shares and the income from them can go down as well as up due to changes in the company, its industry, changes in currency or the economy in which it operates.
- The fund's concentration in a limited number of shares means it may be more affected if an individual company has significant losses. This may at times increase the volatility of the fund relative to its benchmark and the possibility of underperforming the benchmark over some time periods.
- Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.
- All or part of the fees and expenses of the sub-fund may be taken from its capital (rather than income). This may reduce the amount of capital available for investment and adversely affect the fund's overall growth. Shareholders may not get back the original amount invested.
- Please see the Prospectus (section entitled "Risk Factors") to read about other risks.

## Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including certain costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	4.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.*	
Exit Charge (Max)	None
Charges taken from the Fund over the year	
Ongoing Charges	0.71%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The entry and exit charges shown are maximum figures. In most cases you will pay nothing at all - you can find this out from your financial advisor or by contacting Link Fund Administrators (Ireland) Limited.

The ongoing charges figure shown here is an estimate of the charges. The monthly period of January 2019 was used to capture the revised fees of service providers and the current average assets for the same period. The UCITS' annual report for each financial year will include detail on the exact charges made.

For more information about charges, please see the Prospectus (section entitled "Fees and Expenses").

\*On certain sales and purchases of shares an additional charge, an "anti-dilution levy", of up to 2.00% may be payable to cover the costs incurred by the fund in buying or selling securities. This charge will be retained by the fund.

## Past Performance

- The fund and this class were launched on 18 March 2011.
- The figures for this share class are based on total return (i.e. capital and income) in GBP. The figures for the index are shown in GBP. All charges are accounted for except any entry charge.
- Past performance is not a guide to future performance.

## LF Lindsell Train UK Equity Fund, Accumulation Shares, (ISIN: GB00B18B9X76)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

### Objectives and investment policy

#### Objective

The fund aims to deliver capital and income growth and provide a total return in excess of that of the FTSE All-Share Index. There is no guarantee that a positive return will be delivered.

#### Investment Policy

The fund invests primarily in shares quoted on any of the markets of the London Stock Exchange, including the Alternative Investment Market.

#### Essential features of the Fund

- The fund has the discretion to invest in a range of investments as described above.
- The fund's performance is measured against the FTSE All Share Total Return.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Currency Risk: As the fund invests in overseas securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Concentrated Fund: The fund intentionally holds a small number of investments and will be concentrated. The fund may also invest in stocks with a particular industry, sector or geographical focus. The fund may therefore be subject to large swings (both up and down) in its value.
- Non-UCITS Retail Scheme (NURS): The fund can be less diversified than UCITS schemes as it has higher investment limits for certain types of assets. It can also invest in assets which are not available to UCITS schemes. This can increase the potential rewards but can also increase risk.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## SPECIAL SITUATIONS FUND

### KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon Institutional class units (I Acc Class) (ISIN: GB00BG0J2688). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

#### Objective

- To provide long-term capital growth by investing in mainly UK equities using the Economic Advantage investment process.

#### Policy

- The Fund invests at least 80% in companies traded on the UK and Irish stock exchanges.
- The Fund is not restricted in choice of investment in terms of company size or sector.
- Income from the Fund's investments may either be paid to you or reinvested in the Fund.

#### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

#### How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12:00 midday for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk/How to invest](http://www.liontrust.co.uk/How to invest).

#### Investment process

- The Fund can invest in any companies in the UK and Ireland regardless of their size or sector, enabling the managers to find the best opportunities wherever they are across the UK stock market.
- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected. This surprises the market and can lead to strong share price appreciation.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics.
- In the fund managers' experience, the hardest characteristics for competitors to replicate are three classes of intangible assets: intellectual property, strong distribution channels and significant recurring business.
- The Fund measures the universe of Economic Advantage companies for the market's appreciation of their potential earnings growth. Under-appreciated companies have the strongest potential for share price growth.
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by main board directors. Companies are also assessed for employee ownership below the board and changes in equity ownership are monitored.
- Further details may be found in the prospectus and information on the investment process may be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).

#### Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 for its exposure to UK companies.
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may encounter liquidity constraints from time to time. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

M&G Emerging Markets Bond Fund  
a sub-fund of M&G Investment Funds (3)  
Sterling Class I – Accumulation shares ISIN no. GB00B7GNKY53  
Managed by M&G Securities Limited, which is part of the Prudential Group

## Objective and investment policy

The fund aims to provide income and capital growth.

**Core investment:** At least 70% of the fund is invested in bonds issued by the governments, government agencies or companies of emerging market nations\*, which can be denominated in any currency.

**Other investments:** The fund also invests in currencies, focusing mainly on emerging market currencies and major currencies such as the US dollar and euro. It also holds cash or assets that can be turned into cash quickly.

**Use of derivatives:** Derivatives may be used to invest indirectly in bonds, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

**Strategy in brief:** The fund manager selects investments based on an assessment of global, regional, and country-specific macroeconomic factors, followed by in-depth analysis of individual bond issuers. The manager is assisted in the selection of individual bonds by the deputy fund manager and an in-house team of analysts. The fund is diversified by investing in a range of bonds from across the global emerging markets.

\* M&G has the discretion to decide which countries qualify as emerging markets. Typically, these will be countries that the International Monetary Fund or World Bank defines as emerging or developing economies.

### Glossary terms

**Bonds:** Loans to governments and companies that pay interest.  
**Derivatives:** Financial contracts whose value is derived from other assets.

### Other information

The fund may invest more than 35% in securities issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's Prospectus. This investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

## Risk and reward profile

- The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.
- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

### The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
  - Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
  - Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
  - The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
  - The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
  - In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
  - The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Further details of the risks that apply to the fund can be found in the fund's Prospectus.

## Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry charge is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.79%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the year ending 30 June 2018. This figure may change from year to year. It excludes portfolio transaction costs.

For more information on charges, please see the relevant sections of the Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Past performance

- Past performance is not a guide to future performance.
  - The past performance calculation excludes UK taxes from 01 January 2017. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
  - The Fund launched on 15 October 1999 and the Sterling Class I Accumulation share class launched on 19 April 2012.
  - Past performance is calculated using Sterling Class I Accumulation shares.
- △ 19 April 2012. The fund changed its objective. The past performance shown before this change was therefore achieved under circumstances that no longer apply. For more information about this change, visit [www.mandg.co.uk/objectivechange](http://www.mandg.co.uk/objectivechange)

## M&G Global Macro Bond Fund

Sterling Class I – Accumulation shares ISIN no. GB00B78PGS53

Managed by M&G Securities Limited, which is part of the Prudential Group

### Objective and investment policy

The fund aims to provide income and capital growth over five years or more.

**Core investment:** At least 70% of the fund is invested in bonds issued by companies and governments from anywhere in the world. The fund holds these assets directly and through derivatives.

**Other investments:** The fund can also invest in any currency, and cash or assets that can be turned into cash quickly.

**Use of derivatives:** Derivatives may be used to invest indirectly in bonds, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

**Strategy in brief:** The fund is a flexible global bond fund. The fund manager selects investments based on an assessment of macroeconomic factors such as economic growth, interest rates and inflation. This analysis determines which areas of the global bond markets the manager believes the fund should invest in to achieve its objective. It also influences the subsequent selection of individual bond holdings, as well as the fund's currency exposures. The manager is assisted in the selection of individual bonds by the deputy fund manager and an in-house team of analysts. The fund is diversified by investing in a range of bonds from across the global bond markets.

#### Glossary terms

**Bonds:** Loans to governments and companies that pay interest.

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Dynamic Bond Fund ("the Fund") I Accumulation Shares

This is a sub fund of MI TwentyFour Investment Funds. The Fund is an Open Ended Investment Company. ISIN: GB00B5VRV677. Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

### Objectives and investment policy

The Fund aims to provide income and grow your investment.

The Fund will invest in a broad range of bonds (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. The Fund has a highly flexible investment policy which allows it to take advantage of current market conditions and future expectations.

The bonds will be 'investment grade' and 'non-investment grade', as determined by international agencies that provide such ratings. Investment grade bonds, whilst potentially producing a lower level of income than non-investment grade bonds, are considered to be lower risk.

The Fund will aim to reduce the effect of exchange rate movements in the underlying securities relative to the base currency of the Fund. However, these techniques may not be fully effective in completely removing the exchange rate risk.

The Fund may use derivative instruments (such as futures, options and interest rate and credit derivatives) for investment purposes. Derivatives are linked to the rise and fall of other assets. The price movements in these assets can result in movements of the Fund's share price.

The Fund can also use derivative instruments for the purposes of efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 4-5 years.

For full investment objectives and policy details please refer to the prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked at 3 because funds of this type have experienced low to medium rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- There is no guarantee that an asset which provides the security for a bond will maintain its value.
- The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
- Derivatives can be used to help reduce risk but may not be fully successful. Derivatives can also reduce gains you may otherwise have made.
- Currency risk reduction techniques can have an effect on the value of your investment and on the performance of the share class.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.77%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- Switching charge (for switching into the Fund from another fund) 0.05%.
- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is as at 30 September 2018.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- 50% of certain charges are deducted from the capital of the Fund. This may allow more income to be paid but it may also restrict capital growth.
- For more information about charges, please see the prospectus.

## Past performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 26/04/2010.
- Share/unit class launch date: 26/04/2010.
- Performance is calculated in GBP.

## Practical information

- This document is issued by Maitland Institutional Services Ltd and contains information on the I Accumulation Shares only.
- Each fund of the Company has its own pool of assets and liabilities, segregated by law. If one fund were unable to pay for its liabilities the assets of the other funds could not be used to pay for those liabilities.
- You can get further detailed information regarding the Fund, including details of the investment manager and how to switch, buy and sell shares and other share classes available, within the prospectus, the supplementary information document and the annual and half yearly managers' reports. You can get these free of charge from Maitland Institutional Services Ltd, Hamilton Centre, Rodney Way, Chelmsford, Essex CM1 3BY or from our website: [www.maitlandgroup.com](http://www.maitlandgroup.com). These are available in English only. You can also call us on 0345 026 4286, or look on our website for the latest share prices.
- Details of the ACD's remuneration policy (including a description of how remuneration and benefits are calculated, the composition of the remuneration committee and the identities of persons responsible for awarding remuneration and benefits) are available at [www.maitlandgroup.com/uk-fund-administration/mi-fund-data/](http://www.maitlandgroup.com/uk-fund-administration/mi-fund-data/) or by requesting a paper copy free of charge (see above for contact details).
- The Depositary of the Fund is Northern Trust Global Services SE (UK Branch).
- Please note that the tax laws of the United Kingdom may impact your own tax position.
- Maitland Institutional Services Ltd may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.

## Objectives and investment policy

### Objectives

The objective of the Fund is to provide a total return (capital growth and income), by investing worldwide in the shares of insurance-related companies.

### Investment policy

The Fund invests in the shares of companies that are involved in various sectors of the insurance industry. These may include general insurance, reinsurance, life assurance, insurance brokerages and support service companies.

The Fund seeks to outperform a benchmark index - the MSCI Daily TR World Net Insurance Index.

The Fund may invest in financial derivatives (complex instruments based upon the value of underlying assets) for hedging, to reduce risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

There is no intention to pay dividends in respect of the Accumulation Share Classes.

You may sell your shares on days which banks are normally open for business in Dublin and London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

## Risk and reward profile

### Why is this fund in category 5?

The Fund has a high risk rating because it invests in equities, the value of which can move up and down over time to a greater extent than some other investments.

**In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:**

**Concentration Risk** - the Fund invests in a relatively concentrated number of companies based on the insurance sector. This focused strategy can produce high gains but can also lead to significant losses. The Fund may be less diversified than other investment funds.

**Investment Risk** - the Fund invests in equities globally, and share prices can rise or fall due to a number of factors affecting global stock markets.

**Derivative Risk** - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

**Currency Risk** - the Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.

### What do these numbers mean?

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The numerical scale is complex, for example, 2 is not twice as risky as 1.

### More about this rating:

For a more detailed explanation of risks, please refer to the **"Risk Factors"** section of the Prospectus.

## Charges

### One-off charges taken before or after you invest

Entry charge	Up to 5.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charge	0.87%
----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	10.00% a year of any returns the Fund achieves above the benchmark for these fees, the MSCI Daily TR World Net Insurance Index. In the year ending 31 December 2018 the performance fee amounted to 0.33%.
-----------------	--

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry** and **exit charges** shown are maximum figures. In some cases you might pay less. You can find this out from your financial adviser or distributor.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made.

You can find out more details about the charges by looking at the **"Fees and Expenses"** section of the Fund's prospectus, which is available at [www.polarcapital.co.uk](http://www.polarcapital.co.uk).

## Past performance

Past performance is not a reliable indicator of future performance.

The past performance shown does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the **"Charges"** section.

The performance of this class is calculated in British Pounds.

The Fund launched on 16 October 1998. This class started to issue shares on 1 April 2011.

## Practical information

**Fund Depositary:** Northern Trust Fiduciary Services (Ireland) Limited.

### About the Fund:

The net asset value of the fund is calculated in British Pounds. The unit prices are published in British Pounds, on each business day. The prices will be made public at the office of the Administrator, notified to the Irish Stock Exchange without delay and published by the Investment Manager, Polar Capital LLP, on each valuation day on the Investment Manager's website ([www.polarcapital.co.uk](http://www.polarcapital.co.uk)).

This fund is subject to tax laws and regulations of Ireland. Depending on your home country of residence, this might have an impact on your investment. For further details, please speak to your financial adviser.

You are entitled to switch from one fund to another. Please refer to the **"Switching"** section of the Prospectus for further information.

## Royal London Corporate Bond Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B87FJ401

Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The investment objective of the Fund is to maximise investment return through income but with some capital growth over the medium (5 years) to long (7 years) term.

**Policy** The Fund invests mainly in high quality sterling denominated bonds issued by companies. The Fund may use derivatives, but for efficient portfolio management purposes only.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

The Fund is ranked in risk category 3 because its unit price has shown a low to medium level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Credit Risk** Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

*For more about fund risks, see the "Risk Factors" section in the Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))*

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

**Entry charge** 0.00%

**Exit charge** 0.00%

### Charges taken from the fund over a year:

**Ongoing charge** 0.56%

### Charges taken from the fund under specific conditions:

**Performance fee** none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charges figure is based on expenses for the year ending 31 October 2018. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

## Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 29 March 1999 and the share class on 26 November 2012.

The Royal London Corporate Bond Fund  
(Accumulation - Class M Shares) in GBP

The Fund was initially launched as a unit trust but was converted to an open-ended investment company (OEIC) with effect from 30 April 2010.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

## Royal London Short Duration Credit Fund (Income - Class M Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BJ4KW800

Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The investment objective of the Fund is to maximise investment return through income but with some capital growth over the medium (5 years) to long (7 years) term.

**Policy** The Fund invests predominantly in high quality fixed or floating rate sterling denominated bonds issued by companies. The Fund has a target duration of less than 5 years. The Fund may use derivatives, but for efficient portfolio management purposes only.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

**Duration** Measures the sensitivity of the price of a bond to a change in interest rates. Duration is measured in years. A lower duration means there will be a smaller impact on the price of a bond for a given change in interest rates with a higher duration resulting in a larger movement in the price of a bond. The change in the price of a bond has an inverse relationship with the change in interest rates.

The following share classes are available for the Fund: Accumulation M, Accumulation Z, Income M, Income Z and Accumulation R. All share classes are subject to a minimum investment. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

*Class R shares are available only at the discretion of Royal London Unit Trust Managers.*

### Risk and reward profile

The Fund is ranked in risk category 3 because its simulated share price has shown a low to medium level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Credit Risk** Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

*For more about fund risks, see the "Risk Factors" section in the Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))*

## Charges

## Royal London Short Duration Global High Yield Bond Fund (Income - Class M Shares)

A sub-fund of Royal London Asset Management Bond Funds plc ISIN: IE00B9BQGL21

### Objectives and investment policy

**Objective** The investment objective of the Fund is to provide income. The Fund seeks to achieve its investment objective by outperforming its benchmark, the 3 Month LIBOR (the "Benchmark") by 2% per annum over rolling three year periods.

**Policy** The Fund invests a large portion of its assets in short maturity sub-investment grade bonds (those of lower credit quality) issued by companies domiciled in the UK, Europe, Africa, Asia and the Americas. The Fund may also invest in short maturity investment grade securities (higher credit quality). It may also invest in short maturity bonds issued by European governments and government related agencies. The Fund may use financial derivatives, but for efficient portfolio management purposes only.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

*You can buy and sell your shares on each working day in London, except public holidays, at 5.00pm (Irish time) if you tell us before 5.00pm (Irish time) that you want to do so. Instructions received after 5.00pm (Irish time) will be processed at 5.00pm (Irish time) on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The Fund is ranked in risk category 3 because its simulated unit price has shown a low to medium level of volatility historically. The SRRI was calculated using some synthetic data and may not be a reliable indication of the future risk profile. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Credit Risk** Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

**Exchange Rate Risk** Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

**Emerging Markets Risk** Investing in Emerging Markets may provide greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, high currency fluctuation, the adverse effect of social, political and economic instability, weak supervisory structures and weak accounting standards.

For more about fund risks, see the "Risk Factors" section in the Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

**Entry charge** 0.00%

**Exit charge** 0.00%

### Charges taken from the fund over a year:

**Ongoing charge** 0.58%

### Charges taken from the fund under specific conditions:

**Performance fee** none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charges figure is based on expenses for the year ending 31 December 2018. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

## Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 15 February 2013 and the share class on 9 April 2013.

### The Royal London Short Duration Global High Yield Bond Fund (Income - Class M Shares) in GBP

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

# Schroder Global Healthcare Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

Class Z Accumulation GBP (GB00B76V7Q08)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

## Objectives and Investment Policy

### Objectives

The fund aims to provide capital growth by investing in equities of healthcare and medical related companies worldwide.

### Investment Policy

The fund invests at least 80% of its assets in equities of companies worldwide, which are engaged in healthcare provision, medical services and related products.

The fund is positioned to benefit from the structural growth in demand for healthcare provision and medical treatments, supported by demographic trends, improving standards of living and, technological advancements. The investment manager will position the fund to benefit from these strong themes by investing in areas such as biotechnology, generics drug manufacture and supply, pharmaceuticals, health insurance and hospital supplies.

The fund may also invest in collective investment schemes and warrants, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

### Benchmark

This unit class is managed with reference to the MSCI AC World Daily TR Gross Health Care GBP. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

### Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

### Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

## Risk and Reward Profile

### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

### Risk factors

The following risks may affect fund performance.

**Counterparty risk:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

**Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

**Derivatives risk:** A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

**Equity risk:** Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.

**Standard Life Investments Global Index Linked Bond Fund, a Sterling denominated sub fund of the Standard Life Investment Company II, Platform 1 Accumulation Shares (ISIN:GB00B7C0H946). This fund is managed by Aberdeen Standard Fund Managers Limited.**

Objectives and Investment Policy

The fund aims to provide long term growth from a combination of income and capital growth by investing predominantly in sovereign-issued and corporate inflation-linked bonds.

The fund is actively managed by our investment team who may also invest in other bonds (such as conventional government bonds and corporate bonds) to try to take advantage of opportunities they have identified. Non-sterling denominated assets will typically be hedged back to sterling.

The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through

investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

Any income, for example interest income, received by the fund will be reinvested.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

Risk and Reward Profile

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes.

The lowest rating does not mean risk free.

The fund is rated as {3} because of the extent to which the following risk factors apply:

- (a) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- (b) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- (c) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund

being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund makes routine use of derivatives.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. A change in the pricing basis will result in movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

## Charges

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One off charges taken before or after you invest

## Past Performance

Standard Life Investments Global Index Linked Bond Fund, Platform 1 Accumulation Shares, 31 December 2018

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure reflects the amount based on expenses for the year ending 28/2/2019. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

For more information about charges, please see the Prospectus which is available at [www.standardlifeinvestments.com](http://www.standardlifeinvestments.com).

Performance has been calculated over the stated period based on the share price of this share class. It does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Past performance is not a guide to future performance

The fund was launched in 2004. The share class was launched in 2012.

The performance of the share class is calculated in Sterling.

The fund does not have an index-tracking objective.

# KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

THREADNEEDLE HIGH YIELD BOND FUND (THE "FUND")

Class Z Income Shares (GBP) GB00B7SGDT88, a sub-fund of Threadneedle Investment Funds ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

## Objectives and Investment Policy

The aim of the Fund is to provide income.

The Fund invests at least two-thirds of its assets in high income paying bonds (which are similar to a loan and pay a fixed or variable interest rate) issued by companies worldwide.

High income paying bonds are bonds that have received lower ratings from international agencies that provide such ratings. These bonds are considered riskier than higher rated bonds but typically pay a higher income.

The Fund may also invest in asset classes and instruments different from those stated above.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds".

The fund manager will make reference to the ICE BofAML European Currency High Yield Constrained x Sub Fin (GBP Hedged) index as part of the investment process. The Fund does not aim to track the index, and will not hold every security in the index and in theory may hold none. The fund manager may also invest in securities that are not in the index. The ICE BofAML European Currency High Yield Constrained x Sub Fin (GBP Hedged) index is also considered as part of Columbia Threadneedle's investment risk monitoring process, to ensure the overall level of risk taken by the fund manager is not inconsistent with the index.

## Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,  
Typically lower rewards

Higher Risk,  
Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Fund is rated 3 because historically it has shown a medium to low level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund's assets may sometimes be difficult to value objectively and the actual value may not be recognised until assets are sold.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry Charge:	3.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing Charges:	0.73%
------------------	-------

### Charges taken from the fund under specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure is based on expenses for the year ending 07/03/18. This figure may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

All or part of the fees and expenses of the company may be charged against capital instead of against income.

## Vanguard U.K. Long Duration Gilt Index Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

## A GBP Gross Accumulation Shares

ISIN: GB00B4M89245

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

### Objectives and investment policy

- The Fund seeks to track the performance of the Bloomberg Barclays U.K. Government 15+ Years Float Adjusted Bond Index (the "Index").
- The Index includes UK government bonds with maturities greater than 15 years.
- The Fund attempts to:
  1. Track the performance of the Index by investing in a representative sample of Index constituent securities.
  2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations.
- The currency of the share class is GBP.

- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

### Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

### The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.15%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their financial adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2018. This figure may vary from year to year. It excludes portfolio transaction costs.

**For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the prospectus on our website at <https://global.vanguard.com>**

## Practical information

- **Depository:** The Vanguard Investments Funds ICVC ("VIF") depository is State Street Trustees Limited.
- **Documents, prices of shares and further information:** You can obtain copies of the prospectus and the latest annual and semi-annual report and accounts for VIF, along with the latest published prices of shares and other information on the Fund, free of charge from Vanguard Investments UK, Limited, P.O. Box 10315, Chelmsford CM99 2AT (tel. 0800 408 2065) or from our website at <https://global.vanguard.com>. These documents are available in English only.
- **Sub-funds:** VIF is an umbrella fund with segregated liability between sub-funds. This means that the assets of the Fund are maintained separately under law from the assets of the other sub-funds of VIF, and each sub-fund is insulated from any liabilities or claims associated with the other sub-funds.
- **Shares:** The Fund is part of VIF and has both accumulation and income shares. You may switch some or all of your shares of one type, to shares of another type within the same Fund, or between other funds of VIF. An entry charge may apply. Details of switching are provided in the prospectus.
- **Tax:** UK tax legislation may have an impact on your personal tax position. You are recommended to consult your professional tax adviser.
- **Liability:** VIUK may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for this Fund.
- **Remuneration policy:** Details of the Vanguard European Remuneration Policy are available at <https://global.vanguard.com/portal/site/portal/ucits-investment-information> including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits, including the composition of Vanguard's European Remuneration Committee. A paper copy of these details may be obtained, free of charge, on request from the Head of Human Resources, Europe; Vanguard Asset Services, Limited; 4th Floor; The Walbrook Building; 25 Walbrook; London EC4N 8AF.
